

Blockchain.io is the European cryptocurrency exchange going live in October 2018
BCIO tokens will be sold during an ICO prior to the launch

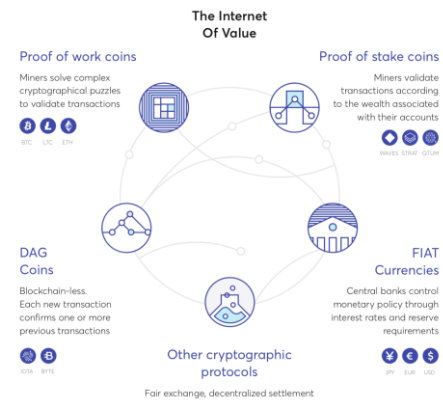

Paymium is the first compliant, fully audited European Bitcoin Exchange, founded in 2011

- Paymium has been hack-free since the beginning of its operations in 2013
- Paymium has proven to be the most secured and reliable exchange in Europe thanks to its experienced executing team, Venture Capital funds backing and financial strength
- A high level of digital asset protection and safe record of transactions
- Resilience under high volume, heavy traffic conditions or attacks
- [Blockchain.io](#) is using Paymium's advanced technology, team, security protocols and infrastructure
- Paymium's 170 000 Users will become members of the [Blockchain.io](#)'s crypto exchange

In conjunction with Paymium, Blockchain.io will be launched in October 2018

- [Blockchain.io](#) aims to become the leading European cryptocurrency exchange by 2020
- [Blockchain.io](#) will offer Crypto and Altcoin listing facilities as well as ICO services
- The platform will offer all the features needed to a comprehensive trading experience including basic and advance orders, peer-to-peer lending and margin trading
- [Blockchain.io](#) will provide advisory and technology services to execute third-party ICO's, new listing and market making services to foster enhanced token liquidity

Exchange safely and efficiently accessing the Internet of Value

- Ultra-secure and non-custodial: encrypted cold storage; hard storage and cryptographic proof of reserves
- Fully compliant and transparent: exhaustive accounting records regularly audited. Aims to comply with all applicable regulations and international laws.
- Reliable infrastructure: minimal downtime, restricted to maintenance, or migration. Resilience under high volume or DOS attacks
- [Blockchain.io](#) is built on fair-exchange protocols enabling cryptocurrency atomic swaps to mitigate counter-part risk
